SUBJECT INDEX

Abuse
  childhood sexual, group therapy for survivors of, 151 (Letter)
Acute psychiatric nursing care
  physical restraint as a nursing-sensitive adverse outcome in, 175–182
African Americans
  with diabetes, psychosocial characteristics and cardiovascular risk in, 226–232
Aggression
  inpatient, cross-cultural differences in psychiatric nurses' attitudes to, 82–92
Agitation
  in relation to social interaction and premorbid personality, in nursing home residents with dementia, 12–18
Alcohol awareness, 203–204 (Editorial)
American Indian worldview
  and sense of belonging, 210–212
    literature review, 212–213
    sociohistorical disruption of, 213–215
Anger
  relation to job motivation among psychiatric nurses, 268–274
Antipsychotics
  for community-dwelling elders with dementia, outcomes, 217–224
Anxiety
  and cardiovascular risk in African Americans with diabetes mellitus, 226–232
Archives of Psychiatric Nursing, new initiatives and frontiers, 157 (Editorial)
Assisted suicide
  and Oregon Death with Dignity Act, 53–54 (Editorial)
Attitudes
  of psychiatric nurses to inpatient aggression, cross-cultural differences in, 82–92
Australia
  Victoria, psychiatric/mental health nursing education in, 76–79
    specialist programs, 78–79
    undergraduate curricula, 77–78

BE SMART, *see* Become Empowered: Symptom Management for Abuse and Recovery from Trauma
Become Empowered: Symptom Management for Abuse and Recovery from Trauma (BE SMART), trauma reframing psychoeducation program
  conceptual framework, 23–29
  curriculum, 29
  development, 22
Burden
  and mastery and areas of concern, among family caregivers of mentally ill persons, 41–50
Burnout
  and defense mechanism, relation to hopelessness and suicide risk among psychiatric nurses, 135–142
  in nurses *versus* partners of persons with schizophrenia and depression, 158–164

Cardiovascular disease
  risk in African Americans with diabetes, and psychosocial characteristics, 226–232
Caregivers
  nurses *vs.* partners, of persons with schizophrenia and depression, burnout in, 158–164
Caregiving
  for mentally ill family member, mastery, burden and areas of concern, 41–50
Childhood sexual abuse
  group therapy for survivors of, 151 (Letter)
Children
  parent satisfaction on mental health services of, 65–74
Cognitive impairment
  mild, risk in older adults, 126–132
Cognitive–behavioral group therapy
  impact on patient depression and self-esteem, 3–10
College women
  with stalking experiences, mental health and lifestyle changes in, 108–115
Communication training
  inservice, to develop empathy in nurses, 249–256
Community-dwelling elders
  with dementia, outcomes of antipsychotics for, 217–224
Comparative optimism
  relation to trait and situational optimism, 144–149
Condom
  and substance use and risk-taking sexual behavior, among YMCW, 32–39
Consumer satisfaction model
  to evaluate parent satisfaction with children's mental health services, 65–74
Cross-cultural differences
  in psychiatric nurses' attitudes to inpatient aggression, 82–92

Defense mechanism
  and burnout, relation to hopelessness and suicide risk among psychiatric nurses, 135–142
Dementia
  outcomes of antipsychotics for community-dwelling elders with, 217–224

Dementia (continued)
residents in nursing home, relationship among social interaction, premorbid personality, and agitation, 12–18
Depression
burnout in nurses *versus* partners of persons with, 158–164
and cardiovascular risk in African Americans with diabetes mellitus, 226–232
and self-esteem, impact of cognitive–behavioral group therapy, 3–10
Diabetes mellitus
psychosocial characteristics and cardiovascular risk in African Americans with, 226–232
self-care in individuals with, 55–62
Doctor of nursing practice, 245 (Editorial)
faculty perspective, 291–292 (Editorial)

Education
in psychiatric nursing, in Victoria, Australia, 76–79
specialist programs, 78–79
undergraduate curricula, 77–78
Elderly
community-dwelling, with dementia, outcomes of antipsychotics for, 217–224
living alone *versus* with relatives, health status of, 193–200
risk of mid cognitive impairment in, 126–132
Emergency department
visits for suicidality in three hospitals, 117–124
Emotional health
of older people living alone *versus* with relatives, 193–200
Empathy
in nurses, developed by inservice communication training, 249–256
Evidence-based nursing
and mental health, 105–107
Extraversion
in relation to social interaction and agitation, in nursing home residents with dementia, 12–18

Family caregiving
for mentally ill, mastery, burden and areas of concern, 41–50

Grandparents
homes headed by, *versus* parent-headed homes, influence in future offending by youth, 258–266
Group intervention research
methodological issues in, 276–280
nonindependent observations, 278–279
sample considerations, 280
selection of unit of analysis, 279
Group therapy
cognitive–behavioral, impact on patient depression and self-esteem, 3–10
for survivors of childhood sexual abuse, 151 (Letter)

Health care
integration of mental and physical health care, 247–248 (Editorial)
Health status
of older people living alone *versus* with relatives, 193–200
Homes
grandparent-headed *versus* parent-headed, influence in future offending by youth, 258–266
Hopelessness
and suicide risk, relation to defense mechanism and burnout among psychiatric nurses, 135–142

Inpatient aggression
cross-cultural differences in psychiatric nurses' attitudes to, 82–92
Inpatient psychiatric treatment, 242–244
Inservice communication training
to develop empathy in nurses, 249–256
Interaction
social, in relation to premorbid personality and agitation, in nursing home residents with dementia, 12–18
International Society of Psychiatric–Mental Health Nurses (ISPN)
2006 conference and keynote speaker, 52 (Announcement)
creating an organizational diversity vision, 152–156
Foundation Nursing Research Grant, call for proposals, 246 (Announcement), 299 (Announcement)
ISPN, *see* International Society of Psychiatric–Mental Health Nurses

Job motivation
relation to anger among psychiatric nurses, 268–274

Lifestyle changes
and mental health, in college women with stalking experiences, 108–115
Living environment
alone *versus* with relatives, influence on health status of older people, 193–200

Mastery
and burden and areas of concern, among family caregivers of mentally ill persons, 41–50
Mental health
and evidence-based nursing, 105–107
and lifestyle changes, in college women with stalking experiences, 108–115
of older people living alone *versus* with relatives, 193–200
Mental health care
integration with physical health care, 247–248 (Editorial)

Mental health nursing education, *see* Education, in psychiatric nursing
Mental health services
of children, parent satisfaction on, 65–74
Mental illness
mastery, burden and areas of concern among family caregivers, 41–50
patients' experiences of being understood, 234–240
severe, physical health in patients with, 205–208
Motivation
job, relation to anger among psychiatric nurses, 268–274

Nurse
psychiatric, future of, 1–2 (Editorial)
Nurse-patient relationship
patients' experiences of being understood, 234–240
Nurse practitioners, psychiatric
cross-cultural differences in attitudes to inpatient aggression, 82–92
versus partners, of persons with schizophrenia and depression, burnout in, 158–164
relation of anger to job motivation, 268–274
relation of burnout and defense mechanism to hopelessness and suicide risk, 135–142
role of, 103 (Letter)
views on care for nonsuicidal self-harming patients, 186–192
Nurses
developing empathy by inservice communication training, 249–256
Nursing homes
relationship among social interaction, premorbid personality, and agitation in residents with dementia, 12–18
Nursing practice, doctorate degree, 245 (Editorial)
faculty perspective, 291–292 (Editorial)

Offending
future, by youth, influence of grandparent-headed *versus* parent-headed homes, 258–266
Older adults, *see* Elderly
Optimism
comparative, relation to trait and situational optimism, 144–149
Oregon Death with Dignity Act, 53–54 (Editorial)
Outcomes
adverse, in acute psychiatric care, physical restraint as, 175–182
antipsychotics for community-dwelling elders with dementia, 217–224
trauma psychoeducation, 94–101

Parasuicide
nurses' views on psychiatric nursing care for patients, 186–192
Parent satisfaction
with children's mental health services, 65–74
Parents
homes headed by, *versus* grandparent-headed homes, influence in future offending by youth, 258–266
Partners
versus nurses, of persons with schizophrenia and depression, burnout in, 158–164
Personality
premorbid, in relation to social interaction and agitation, in nursing home residents with dementia, 12–18
Physical health
of older people living alone *versus* with relatives, 193–200
of severe mentally ill patients, 205–208
Physical health care
integration with mental health care, 247–248 (Editorial)
Physical restraint
as a nursing-sensitive adverse outcome in acute psychiatric care, 175–182
Premorbid personality
in relation to social interaction and agitation, in nursing home residents with dementia, 12–18
Privacy
lack of, in psychiatric wards, relation to patients' views on seclusion, 282–286
Psychiatric nurses, *see* Nurse practitioners, psychiatric
Psychiatric nursing
future of, 1–2 (Editorial)
Psychiatric nursing care
acute, physical restraint as a nursing-sensitive adverse outcome in, 175–182
for nonsuicidal self-harming patients, nurses' views on, 186–192
patients' experiences of being understood, 234–240
Psychiatric nursing education, *see* Education, in psychiatric nursing
Psychiatric treatment
inpatient, 242–244
Psychiatric wards
lack of privacy in, relation to patients' views on seclusion, 282–286
Psychoeducation
BE SMART program
conceptual framework, 23–29
curriculum, 29
development, 22
for trauma-related disorders, wellness outcomes, 94–101
Psychotropic medication
adherence to, and substance cessation, stages of change for, 166–173

Reoffending
by youth, influence of grandparent-headed *versus* parent-headed homes, 258–266

Research
in group intervention, methodological issues in, 276–280
nonindependent observations, 278–279
sample considerations, 280
selection of unit of analysis, 279
Risk
for cardiovascular disease in African Americans with diabetes, and psychosocial characteristics, 226–232
for mild cognitive impairment in older adults, 126–132
for suicide, and hopelessness, relation to defense mechanism and burnout among psychiatric nurses, 135–142
Risk-taking
sexual behavior, and condom and substance use, among YMCW, 32–39

Satisfaction
of parent with children's mental health services, 65–74
Schizophrenia
burnout in nurses *versus* partners of persons with, 158–164
self-care in individuals with, 55–62
Seclusion
patients' views on, relation to lack of privacy in psychiatric wards, 282–286
Self-care
in individuals with schizophrenia and diabetes mellitus, 55–62
Self-esteem
and depression, impact of cognitive–behavioral group therapy, 3–10
Self-harm
nonsuicidal patients, nurses' views on psychiatric nursing care for, 186–192
SeniorWISE study
risk for mild cognitive impairment in older adults, 126–132
Sense of belonging
and American Indian worldview, 210–212
sociohistorical disruption of, 213–215
literature review, 212–213
Sexual abuse
childhood, group therapy for survivors of, 151 (Letter)
Sexual behavior
risk-taking, and condom and substance use, among YMCW, 32–39
Situational optimism
relation to trait and comparative optimism, 144–149
Social interaction
in relation to premorbid personality and agitation, in nursing home residents with dementia, 12–18
Social support, perceived
and cardiovascular risk in African Americans with diabetes mellitus, 226–232
Stalking
mental health and lifestyle changes in college women with experiences of, 108–115
Substance abuse
cessation of, and psychotropic medication adherence, stages of change for, 166–173
and recovery, 288–290
Substance use
and condom use and risk-taking sexual behavior, among YMCW, 32–39
Suicidality
emergency department visits for, 117–124
Suicide
assisted, and Oregon Death with Dignity Act, 53–54 (Editorial)
risk, and hopelessness, relation to defense mechanism and burnout among psychiatric nurses, 135–142
Survivors
of childhood sexual abuse, group therapy for, 151 (Letter)

Trait optimism
relation to situational and comparative optimism, 144–149
Trauma
wellness outcomes of psychoeducation for, 94–101
Trauma Reframing Therapy (TRT)
BE SMART psychoeducation program
conceptual framework, 23–29
curriculum, 29
development, 22
TRT, *see* Trauma Reframing Therapy

Wards
psychiatric, lack of privacy in, relation to patients' views on seclusion, 282–286
Wellness
BE SMART trauma reframing psychoeducation program
conceptual framework, 23–29
curriculum, 29
development, 22
outcomes of trauma psychoeducation, 94–101
Women
college, with stalking experiences, mental health and lifestyle changes in, 108–115
young multiethnic college, condom use, substance use and risk-taking sexual behavior among, 32–39

YMCW, *see* Young multiethnic college women
Young multiethnic college women (YMCW)
condom use, substance use and risk-taking sexual behavior among, 32–39
Youth
influence of grandparent-headed *versus* parent-headed homes in future offending by, 258–266
